Time: 1430 – 1915 hours

AGENDA

1430 – 1500

Registration

1500 – 1545

Opening Session: Setting the context

Representatives from CUTS International, Government and Regulatory Agencies will discuss the need for an enabling regulatory environment for growth of digital economy in India. The need to ensure that its benefits reach the last mile consumer while also safeguarding them from potential risks will be highlighted. The speakers would reflect on the some of the pertinent regulatory challenges that are hampering growth of digital economy and suggest possible solutions.

The session would also feature a brief presentation about the CUTS Initiative, “Future of Digital Economy in India: Optimal Regulations & Imminent Challenge – Diginomics Project”

1545 – 1600

Tea Break

1600 – 1730

Panel Discussion I: “New age regulations for new age businesses: The Industry perspective”

Digital Economies have become incubators for new age businesses, which are based on disruptive technologies and business models. Despite immense success, a number of such businesses have found themselves in turmoil, often owing to the existing/prospective regulations. Due to the disruptive nature of such businesses, the regulatory bodies often find it difficult to regulate such entities, and end up applying archaic regulations, which may hamper the growth of these digital enterprises. Thus, this session will highlight the industry perspective from India and Philippines vis-à-vis regulatory burden and need for adoption of optimal regulatory framework to promote innovation.

1730 – 1900

Panel Discussion II, “Hearing Voices from the Ground: Challenges faced by consumers and possible solutions”

The digital economy has facilitated delivery of goods and services to consumers convenient and at much lower direct costs, than conventional business models. At the same time, it has also raised scepticism in the mind of the consumers on issues such as cyber security of online transactions, online privacy, data protection, redressal, etc. Such issues need to be factored in by the policy makers, while developing policies/regulations. Thus, this session will discuss the imminent challenges faced by the consumers, and the measures needed to address them, effectively and efficiently, which will ultimately benefit the consumers holistically.

1900 – 1915

Closing Remarks

The closing session will summarise the discussions from the various sessions, highlight key conclusions, set out next steps under the project

1915 – 2200

Dinner
